## REVISION OF PRE-EMPTION LAW

### Communication by "Lex"

The Minister of the Interior, Dr. Roche, is to be in the west at an early date. This should afford Carlstadt Farmers an opportunity to interview him with regard to the hardship entailed by the present pre-emption law in this district. Other districts are organizing and if the government is not going to meet legitimate demands in a generous spirit then they will wake to the fact that one third of their homesteaders, after proving up will look for green pastures.

This spirit is not confined to this district, a spirit of unrest and dissatisfaction exists all over this South country where many of us have spent thousands of dollars in developing this part of the country and have had no returns. Many have suffered bereavement, sickness etc. And although having had no return from the land worth speaking of yet every spring have plowed and sowed again trusting to providence that the season would be favorable. Disappointment has been the key note and the suffering has been hidden as much as possible. The writer has ample opportunity to know intimately the true facts of the situation.

The crop this year in this part of the province will yield about fifty-five to sixty per cent. If the price this year does the same stunt as last year then the outlook is not promising. The Loan Companies are getting alarmed at the numbers crossing the line into the States, where inducements are being given to locate on much better terms than in the Canadian West, and where officials are assisting settlers every way to locate to advantage. Both our homestead and pre-emption laws will shortly have to be remodelled. The pre-emption law in my opinion is a hardship. The present drafted. In the first place it almost compels a man to take out a loan on his farm as he is tied up by the residence conditions. If the farmer was bound to do so much cultivation duties only, and no residence, he could go out and work and earn enough money wherewith to buy stock and lay the nucleus of a herd of cattle or pigs, and not depend entirely on his grain, or require a loan. The task also of repaying the loan is no light one, and added to this the price of the pre-emption, \$3.00 per acre plus interest is heavy.

### GET YOUR CANADIAN HOME

FROM THE CANADIAN PACIFIC

Wonderfully fertile land is offered for sale by the Canadian  
Pacific Railway Company at prices ranging from \$11 to \$30  
per acre. There is no better agricultural land than this  
virgin Canadian soil. It is unsurpassed for all forms of agri-  
culture, including grain growing, stock raising, dairying,  
poultry culture, vegetable growing, and general mixed  
farming! The lands are convenient to railways and mar-  
kets, and are located in a land of low taxation and delightful  
climate.

#### TWENTY YEARS TO PAY

Under the Company's new policy, no land is sold to specu-  
lators, but only to the one who will occupy and improve it.  
The terms of sale are now one-twentieth cash and the balance  
spread over twenty years, with interest at six per cent per  
annum.

#### ASSISTANCE TO FARMERS

Under certain conditions the Company will advance a loan  
of \$2000 to new settlers to be used in erecting a house and  
barn, fencing the land, and stocking well. This loan is re-  
payable on the same terms as the purchase price.

#### News Anniversary.

This issue marks a mile-  
stone in the history of Carl-  
stadt's paper. Just one year  
ago this week the present  
management assumed con-  
trol. Those who received  
our first issue will remember  
that we promised to make  
the News a paper that every  
one in town and district who  
believed in their new home  
would be proud of. We be-  
lieve that we have done all  
this and more. Everyday  
we get those little encomiums  
that makes life worth living,  
and encouragement in the  
newspaper business is a cer-  
tain blessing. To the hun-  
dreds who have come forward  
with their subscriptions, and  
the Carlstadt business men  
who have assisted us and  
stayed with us in the enter-  
prise we express our heartfelt  
thanks.

Without boasting we may  
be allowed to say that our  
style of journalism has adver-  
tised itself in other places and  
we have on our desks flatter-  
ing and tempting offers from  
Boards of Trade in other  
towns to move our plant but  
we are wedded to Carlstadt.  
As long as Carlstadt citizens  
show in a substantial manner  
that the News is wanted here  
we will remain.

#### Fearful Finance.

The Brooks Bulletin re-  
marks very appropriately up-  
on the expense of public  
works as engineered by cer-  
tain cities. It says

A sewerage system at a  
cost of a fifth of a million!  
Bassano has expensive  
tastes these hard times.

Two hundred thousand dol-  
lars. The News has not  
learned what benefits Bassano  
citizens are to derive from  
the expenditure of such a  
huge sum, but all must gaze  
in admiration at the audacity  
which leads a town not so old  
as Carlstadt and which has  
grown to only slightly larger  
proportions, to undertake an  
enterprise of such magnitude.  
The ratepayers are now asked  
to consent to the borrowing  
of an additional fifty thousand  
dollars, nearly forty per cent  
of the original estimate. A  
great protest has gone up that  
this is not the result of graft,  
extravagance, or inefficiency,  
and a desperate attempt made  
to show that a difference in  
estimating of seventy thou-

**Pre-emption Laws Change Desired North of Red Deer**

Big Deputation to Go to Ottawa to Press Claims of Settlers on the Dominion Government.

Homesteaders in the district north of the Red Deer river, an immense area known to be one of the richest agricultural districts in Alberta, and closely settled, are arousing a widespread agitation yet to prove upon, in Alberta. They will send a big deputation to Ottawa to press their claim.

Pre-emption is purchased, as most people know at three dollars an acre, and but 160 acres can be pre-empted and only by a homesteader, the land to lie in proximity to the homesteader, originally settled upon. But duties similar to homestead duties, have to be done in connection with the pre-emption. Residence of six months in a year, building of a home and the breaking of acreage are included in the duties, thus homesteaders has to live six years upon his homestead and his pre-emption combined, and pay \$850 for his pre-emption. The homesteader claims the pre-emption duties are too onerous, especially in times of tight money and where the distance to market is a long one. Very obviously, it is the government's intention to have the land well-settled, and it is not the \$3 an acre which is received, that tempts the government to part with the land. Thus the duties were imposed. When a homesteader serves three years on his homestead and three years on his pre-emption he has cultivated a fondness for the land and does not easily leave it. It is home to him, a home gained through travelling a path of hardship and privation, often, and never easily gained. The chances are he has horses and cattle, land under crop, barns and sheds and miles of fences. This, apparently is the government's ideal homesteader and pre-emptor. But many homesteaders have found out that it takes money to successfully perform the duties on both homestead and pre-emption, and if some way is not devised to relax the pre-emption, there will be many abandoned. Very few homesteaders start with enough capital. A man with plenty of money usually finds an easier path through life than homesteading. By working for six months a year the homesteader can gather a "grab stake" to carry him through the balance of the year upon his land, but when he has a pre-emption, (and a 320 acre farm is not a large farm out west) and has to pay the three dollars and perform similar duties to what he has done on his homestead Mr. Homesteader finds the shoe beginning to pinch. Were he able to work steadily the year round at some occupation he could pay the money for the pre-emption and then go back upon his 320 acre farm, it would be all right, but he has to serve six months a year on his pre-emption. This handicaps, discourages and disheartens him. This is felt badly where railways are forty, fifty and even sixty miles from the homesteads and grain growing is not lucrative because of the long haul and heavy freightage rates.

It is a question of immediate import and this fall will see a strong agitation among the homesteaders. The government has found its regulations with regard to homesteads very satisfactory heretofore, but will have something of a problem in settling this matter with the best results to the homesteader and to the country.

THE Advertising Directory of the Carlstadt News develops in a manner highly satisfactory. The most influential and progressive of Carlstadt's business men now take advantage of the News as a means of keeping in touch with the people. It is being realized throughout the Carlstadt district that here is the most powerful business enterprise to be found within a large radius. In nearly every department of this paper is to be found the best, western journalism affords. It has the privilege of being able to command the services of some of the most brilliant writers in the province. Typographically, the News is almost perfect and certainly is unequalled. The press, on which the News is printed, is eminently adapted for the work, and the skill and experience which are used in this department are unsurpassed by anything in the country. The people of Carlstadt appreciate this and the circulation increases daily in a manner highly gratifying. Advertisers are taking advantage of their opportunity. Many are realizing that unless they do this, their business will not prosper. Carlstadt is becoming known to the outside world and many enquiries are being made as to the business prospects to be met with here.

We ought to get together as soon as possible and interview this real live Minister and state our position clearly and endeavor to get a concession which we are justly entitled to. The present administration are intending I understand to administer the various sections of the homestead law as it is written. The Act says you must sleep on the homestead. This according to their interpretation will prohibit a man from making proof successfully who goes to bed and cannot sleep. Perhaps his wife lies and tells him about the mysteries of a certain ladies bonnet trimmed with peacock tails, and mosquito netting and as great a mystery as one of Thompsons sausages. Now here he is in a fix, he's not sleeping on his homestead lying awake in bed will make you liable to cancellation. Our present homestead and pre-emption laws want materially adjusting for what use are the settlers who only wear out the seat of half a dozen pairs of overalls, during the winter in holding down his claim and who does not invest in any stock or machinery. All these points are worth bringing up and I hope Mr. Editor you will solicit a free discussion of this important question. A large machinery company and the Loan Companies are also taking steps to protect their interests caused by the unrest and disappointment of the pre-emption law.

Yours faithfully,

LEX
